Full year 98 is at 224.25 bn. units

Forecast for 1999 is now in Planner.

The new Parliament and Marlboro products have not been incorporated into the 99 forecast yet. We will retransmit the database on Monday once they are included.

In the meantime please disregard the 99 forecast for the Parliament brands since no adjustments have been made to reflect the introduction of the new packings.

The revised November Basic B2G1F/B8G2F (AFFs 373 and 374) is now included in Planner.
